LIST OF BUILDING PERMIT APPLICATIONS REVIEWED UNDER BY-LAW 1305 ON SITE PLANNING AND ARCHITECTURAL INTEGRATION PROGRAMMES
### Description of Project:
To replace original brick parapets with metal railings of the front façade balcony.

### Planning Advisory Committee Recommendation:
At its meeting of September 3rd, 2019, the Planning Advisory Committee recommended to Council to refuse the application, which consists of a revision to the permit authorized in 2013, because the proposed solution to replace the original brick infill railing height walls, which were removed with metal railings, is not acceptable; the applicant must find the closest brick to match the existing and reinstate the walls between the porch columns.
